

cut costs

...say hello to IP Monitoring

Introducing the LoBenn series of IP transmitters and servers

Introducing the LoBenn series of IP transmitters and receivers. With IP now dominating the communications market, your future lies with embracing this technology for alarm communications. AT&T states that 700,000 POTS lines a month are disappearing. This product set allows you to migrate already installed customers to IP technology quickly, easily and inexpensively.

Why IP?

- **It's a matter of time**
...proactively migrate your customers to IP
- **Higher level of service**
...provide the customer a level of service they will soon expect
- **More secure**
...any type of tampering with communications is reported immediately
- **Always on**
...the IP network is self healing, higher availability
- **Reduces costs**
...IP allows consolidation of lines over one connection
- **Impressive ROI**
...your customers will recover conversion cost in a few months

LoBenn Solution Highlights:

- **Active Communications**
... Constantly monitors line to ensure connectivity
- **Interfaces with virtually all existing fire panels**
...protecting clients investment in existing technology
- **Automatic fail-over to back-up central stations** ...no reprogramming required – up to 7 back-up central stations
- **Ability to pinpoint IP network failures**
...know exactly where communication failure is
- **E-mail notification of off-normal events**
... immediate notification of communications problems
- **Easy to install**
...no costly upgrades

Your IP Alarm Monitoring **Solution** - Any Panel, Any Format, Anywhere
